DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest a *non-attached* monitoring device for monitoring an engineering condition of a tire having the combination of claimed features including transmitting the monitoring data related to the engineering condition to a reader positioned outside of the tire; the tire having a sidewall that is an oriented attenuating body for the monitoring device; the oriented attenuating body having *maximum and minimum attenuating levels; the non-attached monitoring device being loosely disposed within the tire*; the monitoring device including a monitoring assembly and an antenna, *the antenna having an orientation that radiates a transmission pattern; the transmission pattern having a portion that is attenuated by the oriented attenuating body of the tire sidewall at the minimum attenuating level regardless of the orientation of the monitoring device with respect to the tire sidewall.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
